DUTEX IS COPOLYMER AND EMULSION BASED, trowel applied synthetic grooved finish TEXTURE. The product is formulated with modified acrylic emulsion and reinforced with marble aggregates to withstand humidity, rain and different weather conditions. It is used for decoration and long term protection of wall surfaces. It is highly recommended for freshly plastered surfaces and also ideal for old weather destroyed surfaces. On new surface it avoids the use of cement paint and putty and top coat can be applied directly over textured surface. It offers a variety of patterns using different application techniques. It is suitable for interior and exterior surfaces of plaster, concrete, wooden boards and previously painted surfaces. It is applied using Trowel .It works best with Ducon primers.

SURFACE PREPARATION :

- Before application the surface shall be free from cracks, leakages, algae, moss, fungus, undulations and rust.
- Remove all loose paint, dirt, fungus and salt deposits by wire brushing. Wash the surface and allow it to dry.
- All cracks shall be filled by crack seal or by mixture of Ducon Shield with cement and sand. Refer Ducon Shield specification for recommended method.
- Two coats of Shield shall be applied on new surface for water proofing.

DIRECTION FOR USE :

- Normally primer is not required , however in case of repainting it is recommended to apply one coat of exterior primer .
- Apply one coat of rustic Dutex with steel trowel and make design as desired by plastic plain rectangular trowel .
- Allow it to dry for 16-18 hours
- Apply 2 coats of ducon exterior emulsion of Trust / Lavanya grade .

SAFETY PRECAUTIONS :

- Avoid contact with eyes and skin • Use safety equipments like gloves, glasses , face mask etc . • Keep away from children • Moisture on wall shall be below 12-13% and PH of wall surface shall be between 7-11.
